Overview

This workforce study reviews education programs and completions within an approximately 100-mile radius of the four-county Asheville metropolitan statistical area (referred to as Asheville metro¹ in this report). The following select fields of study are examined:

- CIP 11: Computer and Information Sciences and Support Services
- CIP 14: Engineering
- CIP 15: Engineering Technologies and Engineering-Related Fields
- CIP 52: Business, Management, Marketing and Related Support Services

Programs highlight talent development at institutions in the radius and program completions provide insight into the preparedness of students and job seekers to offer trained skills. The Asheville metro's technical colleges and universities offer many programs that align with the select fields of study, providing skills for the workforce and helping to meet business needs. While talent and labor can be attracted from outside of the 100-mile radius, this report offers further insight into the scale and proximity of nearby training and talent, pointing to the area's positioning to support business goals.

Counties Represented

The study captures 79 counties in the 100-mile radius of Asheville metro. The overall population of the counties combined in 2015 was approximately 5.6 million which has grown 3% since 2010. 20-24 year olds are the largest cohort, with population estimated at nearly 395,000. 55-59 year olds followed with just over 393,000.

Asheville metro, due to its location in the western part of North Carolina, is well positioned to take advantage of having a centralized location in the eastern part of the United States. For example, both the major cities of Chicago and Jacksonville are about a 10-hour drive from Asheville. In addition, the Asheville metro area has 100 million people living within a 500-mile radius (TIP Strategies, Austin, TX, 2015).

¹ The Asheville metro is comprised of Buncombe, Haywood, Henderson, and Madison counties.

Figures 1 and 2 provide map views of the radius extent. Full county data is included if the county's centroid is contained in the radius. For a listing of counties, refer to Appendix A1.

Institution Enrollment and Completion Estimates

Over 80 regional educational institutions are included in the study area with approximately 290,000 students enrolled². College enrollment estimates emphasize a strong presence of students engaged in training, certificate, and degree granting programs in the 100-mile radius.

Completions point to a steady course of trained and educated individuals that help provide a foundation for a skilled workforce. Overall 2014 completion estimates show just over 55,000 completions earning an Associates, Bachelors, or Graduate degree³. This number jumps to a little over 69,000 when other types of training awards or certificates are included. Refer to Appendix A2 for a listing of each institution included in the study, with overall enrollment and completion estimates. For institution location, refer to Appendix A3.

Figure 3 highlights the presence of 2-year and 4-year institutions in the study region.

Select Program Descriptions

The National Center for Education Statistics (NCES) provides the standard Classification of Instructional Programs (CIP) coding scheme to organize fields of study. According to the NCES, the purpose of the CIP is to provide a taxonomic scheme that will support the accurate tracking, assessment, and reporting of fields of study and program completions activity.

The codes should not be confused with the titles that institutions assign to majors, minors, and other awarded academics.

Four CIP codes have been selected to examine completion activity taking place at institutions within the 100-mile radius of Asheville metro:

- **CIP Code 11: Computer and Information Sciences and Support Services**
CIP Code 11 and sub-categories are defined as instructional programs that focus on the computer and information sciences and prepare individuals for various occupations in information technology and computer operations fields.
- **CIP Code 14: Engineering**
CIP Code 14 and sub-categories are defined as instructional programs that prepare individuals to apply mathematical and scientific principles to the solution of practical problems.
- **CIP Code 15: Engineering Technologies and Engineering-Related Fields**
CIP Code 15 and sub-categories are defined as instructional programs that prepare individuals to apply basic engineering principles and technical skills in support of engineering and related projects or to prepare for engineering-related fields.
- **CIP Code 52: Business, Management, Marketing, and Related Support Services**
CIP Code 52 and sub-categories are defined as instructional programs that prepare individuals to perform managerial, technical support, and applied research functions related to the operation of commercial and non-profit enterprises and the buying and selling of goods and services.

The select programs combined for the institutions represented in the 100-mile radius show 15,989 completions in 2014.

The following sections break this figure down for each instructional program:

- Regional Completions by Award Level
- Regional Completions by Institution
- Frequently Targeted Occupations

CIP Code 11: Computer and Information Sciences and Support Services

In the study region, institutions offered 30 programs related to Computer and Information Science and Support Services fields of study. There were 1,866 program completions in 2014.

Table 1 shows 34.6% of completions were awarded Associates degrees, 30.9% were awarded Bachelors degrees, and 27.1% were awards or certificates of less than 1 academic year.

**Table1. Computer and Information Sciences and Support Services

Occupations frequently related with select programs of study can also add insight into the presence of skillsets and the connections between regional programs, talent development, and the workforce. While not intended to be a comprehensive list, Table 3 shows frequently targeted occupations associated with CIP 11: Computer and Information Science and Support Services programs. Employment in these occupations is estimated at 38,252 jobs in the study radius, pointing to available talent and labor pool present in the study region.

Summary

The study region is home to numerous technical colleges and well-established institutions. These collectively enroll several hundred thousand students. These institutions offer dozens of programs in the select fields of study. Each plays a role in positioning the area to be responsive to both developing and providing talent. The labor force also employs skills in occupations considered to be, in various ways, related to the fields of study. These skills and aptitudes may be transferrable.
